Describe

Generating a statistic summary of dataset.

```
In [7]:  df.describe()
```

Out[7]:

	fixed acidity	volatile acidity	citric acid	residual sugar	chlorides	free sulfur dioxide	total sulfur dioxide	density	pH	sulphates

Checking the correlation (positive or negative between values)

```
In [26]:  correlation = df.corr()
          plt.figure(figsize = (10,10))
          sns.heatmap(correlation , cbar = True , annot = True , annot_kws = {'size':8})
```
